

Content

What factors influence your decision to trust and engage with the content on a website?

Areas for Improvement

Credibility

To enhance user trust and connection, articles should show **clear authorship**.

Providing well-documented information supported by sources, user reviews, or personal recommendations **reinforces credibility** and fosters a stronger sense of reliability among viewers.

Integrated Content

Users emphasized that content seems generic and not really integrated with MFC.

Expanding the comprehensive guidance the MFC offers on addressing misinformation, cyberbullying, and internet safety.
